"ELITE CYBER RISK UNDERWRITING SYSTEM"

CYBER RISK ASSESSMENT SUMMARY

CLIENT INFORMATION

Organization:	RSB Systems Pvt Ltd
Email:	Not Provided
Industry Type:	IT and Technology Services
Submission Date:	Not Provided
Protocol ID:	Not Provided

ASSESSMENT OVERVIEW

Overall Risk Score:	37.50
Risk Tier:	D
Status:	ELIGIBLE FOR UNDERWRITING
Normalized Score:	44.00
	100.00

RISK EXECUTIVE SUMMARY

Based on the evaluated controls, the organization demonstrates a Moderate risk profile. The calculated risk tier is D with a normalized score of 44.00.

DOMAIN-LEVEL PERFORMANCE

Domain	Score %	Earned	Max	Weight %	Contribution
Network Security	58.3%	7.0	12	7.0%	4.08
Data Backup and Recovery	22.2%	2.0	9	7.0%	1.56
Certifications	20.0%	1.0	5	4.0%	0.80
Background Verification and Employee Awareness	87.5%	7.0	8	4.0%	3.50
Regulatory Compliance	25.0%	1.0	4	5.0%	1.25

DISCLAIMER: This report is based on self-attested controls. Final underwriting is subject to Share India Insurance Brokers's verification and approval.

Domain	Score %	Earned	Max	Weight %	Contribution
Organizational Policies and Procedures	100.0%	6.0	6	5.0%	5.00
Physical Perimeter Security	0.0%	0.0	5	7.0%	0.00
Endpoint Security	100.0%	6.0	6	6.0%	6.00
IoT and OT Network	35.0%	1.8	5	9.0%	3.15
Asset Management	100.0%	5.0	5	6.0%	6.00
Identity and Access Management	20.0%	1.0	5	6.0%	1.20
Vulnerability Assessment and Penetration Test	0.0%	0.0	4	5.0%	0.00
Ransomware Supplemental	0.0%	0.0	5	5.0%	0.00
Dark Web Exposure	25.0%	0.8	3	2.0%	0.50
Change/Patch Cadence	33.3%	1.0	3	5.0%	1.67
DLP and DSPM	0.0%	0.0	2	4.0%	0.00
Active Directory Configuration	0.0%	0.0	2	3.0%	0.00
Incident Management and Response	37.5%	0.8	2	6.0%	2.25
SOC and SOAR Capabilities	14.3%	1.0	7	4.0%	0.57

UNDERWRITING NARRATIVE

EXECUTIVE SUMMARY: The organization shows a limited control maturity level with an aggregate score below the minimum underwriting threshold. The 'Tier D' classification reflects a need for a comprehensive systemic overhaul of various security domains to align with industry best practices. This assessment serves as a point-in-time diagnostic of the organization's defensive capabilities against modern cyber-attacks.

Furthermore, sub-optimal maturity levels observed in IoT and OT Network, Network Security, Data Backup and Recovery present potential entry points for lateral movement or data exfiltration, significantly impacting the overall security posture.

STRATEGIC ROADMAP: To significantly strengthen the security posture and potentially move to a more favorable risk tier, immediate attention should be directed towards the implementation or refinement of How often are IoT and OT network security assessments conducted, Are there network segmentation strategies to isolate IoT and OT devices, Is there monitoring of IoT/OT device communications. Successful remediation and re-evaluation of these critical gaps are essential prerequisites before the risk can be reconsidered for standard underwriting protocols.

CORRECTIVE MEASURES TO ACHIEVE TIER A

To improve the current Risk Tier from D (Score: 37.50) to Tier A (Target Score: 90.00+), an improvement of at least 52.50 points is required. Implementing the following controls will maximize your score improvement:

Domain	Missing Control / Question	Recommended Action	Potential Impact
IoT and OT Network	Are there network segmentation strategies to isolate IoT and OT devices?	Establish network segmentation strategies to isolate IoT and OT devices	+9.00 pts
IoT and OT Network	Is there monitoring of IoT/OT device communications?	Ensure there monitoring of IoT/OT device communications	+9.00 pts

Domain	Missing Control / Question	Recommended Action	Potential Impact
IoT and OT Network	Are default credentials changed on all IoT devices?	Ensure default credentials changed on all IoT devices	+9.00 pts
Network Security	Is DDoS Protection implemented?	Implement DDoS Protection	+7.00 pts
Network Security	Is WAF (Web Application Firewall) implemented?	Implement WAF (Web Application Firewall)	+7.00 pts
Network Security	Is IDS/IPS implemented?	Implement IDS/IPS	+7.00 pts
Network Security	Are VPNs used for secure remote access?	Utilize VPNs for secure remote access	+7.00 pts
Network Security	Is wireless network security implemented with encryption?	Implement wireless network security with encryption	+7.00 pts
